Subject Plainwell No. 2 TCRA removal area revision

US EPA RECORDS CENTER REGION 5

402969

Mike and Sam:

As you recall, at our September stakeholder meeting we reviewed the downstream-most portion of removal area 5 at the P2 TCRA, to determine the best location and approach for a canoe portage as a component of the final restoration. At that time we observed a guy wire anchor point for the nearby utility pole in this area, and subsequently had the location of the anchor surveyed.

The location of the anchor point is shown on the attached revised drawings, which also show an adjustment to the removal area boundaries to provide a 25-foot offset to avoid compromising the integrity of the anchor. Final details of the canoe portage restoration are still being developed and are not shown on these drawings.

Please review the attached and provide your approval or comments. Thanks.
